

AmmonitConnect Remote Access

Internet connection to data logger for configuration

AmmonitConnect
Remote Access

Description

AmmonitConnect provides easy access to Meteo-40 plus data loggers. No need to buy an expensive SIM with a public IP address.

- The service is completely free of charge.
- No measurement data is stored on our server. AmmonitConnect only acts as a pass-through for the user.

Note, that AmmonitConnect is for Meteo-40 plus, while older Meteo-40 use the tunnel, which is similar in scope and features.

Your access to AmmonitConnect is https://<serialnumber_datalogger>.connect.ammonit.com/

You can purchase the AmmonitConnect software and run an instance yourself. Please contact our [sales team](#) for details.
